Attending the sessions of the Mississippi Hospital Auxiliary Conference held at the Hotel Buena Vista, Biloxi, June 20, 21 and 22nd were members of the local Auxiliary of Hancock General Hospital.

## STATES JOB TOTAL REGISTERS INCREASE

Last report shows that non-farm employment increased substantially during the month of April. This is gratifying since Mississippi's job total is an accurate measure of economic conditions.

Non-farm employment in April amounted to 349,000, up from 347,000 in March. The monthly average for 1960 is 347,100 more than a year ago.

Manufacturing total was 147,000 which is 300 above this past March and 3,000 over a year ago.

Construction jobs increased by 1,000 to a total of 75,000. These for business volume. Residential figures are encouraging because the state's sixteen business districts are leading the nation in residential construction.

A lease has been signed for another business to be located in the North Bay Shopping Center and an announcement will be soon coming in two weeks.

Because of the very popularity of the tennis sports complex and the men and women of all ages, the sport of bowling facilities have led the nation.

Plans are being made to build a new building to house the

new establishment to be located in the Bay St. Louis Shopping Center.

#### THE NEW SHOPPING CENTER

Despite reports to the contrary, building continues to boom, especially with the announcement today of the initial step in the development of the new North Bay Shopping Center, which will be located on a triangle, bounded by Highway 90, Dunbar and Ulman Avenues.

With the constant talk about bringing new industry into the Hancock County and Bay St. Louis area little thought has been given the amount of business which bypasses this area every day throughout the entire year.

According to figures released by officials of the Bay St. Louis bridge, during the year 1959, a total of 2,336,225 cars passed through Bay St. Louis. This is a daily average of 6,401 vehicles.

Think of the amount of business that could be brought to this community if just a small percentage of these vehicles could be induced to stop here and do some sort of business.

The idea of this shopping center being located on the highway was done with this thought in mind and if it can be accomplished, will most certainly strengthen the economy of this area, by bringing an unlimited amount of business to the merchants located there.

The first business to locate there has already been contracted for and construction is scheduled to begin about July 1st, and will cost in the neighborhood of \$100,000.00. A story appears elsewhere in this issue about this shopping center and the first business to be built in it. We hope others will not be too long in following suit.

#### NOTICE TO BIDDERS

Save a Life — the safety experts tell us. "Save-A-Dollar" — the economists tell us. But the clothing folks say "Save-A-Bag."

They mean a cotton bag you bought feed, flour or other product in. From it you can make many things — an apron, a potholder, a luncheon set, a blouse.

#### CABBAGE HEADS

Next time you go to the grocery store — cut several heads of cabbage from your garden — do a little hand weighing of them. You'll find some heads are firm and solid. You'll find others loose and light weight. The firm and heavy head gives you the most for your money — if you buy by the head or if you buy by the pound. The firm, solid head are usually better quality than the light-weight ones.

Select cabbage with green fresh leaves attached to the stem. Select those free from bruises, worm injury, decay and yellow leaves.

### Why there's plenty of electricity wherever you go

You feel like a pioneer as you pitch camp in the pines, and drop your fishing line in some secluded spot. You're roughing it but not enough to spoil your fun. For today wherever you roam, rural electric lines supply the conveniences of home.

Electrification of remote areas like this was long delayed. Rural people were widely scattered — supposedly too costly to reach with electricity. Then came the Rural Electrification Administration, and rural Americans organized non-profit groups, borrowed money from the REA, and built their own power lines.

These rural electrics have agreed to serve everyone

near or far, big or small—at lowest possible cost. At the same time, they've been prevented by law from serving towns of over 1,500, and people already being served. But despite these handicaps, in only 25 years, rural electric systems have built 1.5 million miles of line and today serve 16 million rural Americans.

Best of all, the cost of rural electrification is borne by the people who use it. And already 1,000 rural electrics—mostly cooperatives—have paid over \$1 billion in principal and interest on their \$3½ billion REA loans—added proof that is one of the best investments our Nation has ever made.

Here...  
you'll find a Faith  
to live by...

It's quiet...de. Quiet with the peace  
of centuries, for this is God's House.Within these walls, the worries which  
loomed so large outside become  
less fearsome...for the first time perhaps  
you see them in their true perspective.  
If this alone were the reward of Faith, it  
would be enough. But there is more.Faith is a source of strength, a reservoir  
of power that helps you meet the needs  
of every day. By worshiping with your  
family each week at your church or  
synagogue, you're giving them a measure of  
security no amount of money could buy.  
The Faith to hope...to grow...to live by.

Build a stronger, richer life...

**"Wild River" To Be At The A. & G. Theatre June 25, 26 and 27th.**

"Wild River", Elia Kazan's explosive CinemaScope, De Luxe color production for Twentieth Century Fox of the clash between the proud people of Tennessee and a federal agent ordered to clear them from their ancestral homes to make way for the mighty TVA project, will play June 25, 26 and 27 at the A&G Theatre.

Starring beautiful Lee Remick as a gentle country girl, and Montgomery Clift as the government agent assigned to move Jo Van Fleet, who is cast as Miss Hemick's grandmother and the last holdout in the path of the dam, the Paul Osborne script, taken from a best selling novel by famed writer, William Bradford Huie, combines action and romance with a true story taken from one of the harshest cultural clashes in America's recent history.

The film was made entirely on location in Cleveland, Tennessee. That is producer-director Kazan's way of working... filming the story where it happened. He made a movie about stevedores
